TRIAD Construction Completes Renovations to MATC

West Allis, WI – Triad Construction is proud to announce the completion of two large-scale remodels to Milwaukee Area Technical College (MATC).

The first remodel, which took place on MATC's downtown Milwaukee campus, was undertaken with the goal of updating portions of the school and providing new amenities for students. The renovation included a respiratory simulation lab to help students learn how to respond in true-to-life medical situations. Crews also added a student accommodation services center to provide aide to students with disabilities. Lecture halls, classrooms, and a computer lab were also refurbished. In addition, the campus' Highland Street parking structure was renovated. Crews made structural repairs, installed reinforcements, and poured a new concrete deck.

Triad Construction's second remodel, which took place on the technical college's Oak Creek campus, revamped significant portions of the school. This included science labs, a business laboratory, and computer labs. Crews also put in place a medical simulation lab to help students practice medical techniques in a healthcare setting. Additionally, a student accommodation services center was included on this campus.

Triad Construction Inc. is a construction firm organized around a team of skilled professionals. We enjoy working with clients who value relationships and are looking for a committed team to help them reach their construction goals.
